PROJECT ADDRESS

1811 S Quebec Way #169

DESCRIPTION OF WORK	AMOUNT
1. Pressure Reducing Valve (PRV) Replacement Remove existing PRV and install new PRV with required fittings. Adjust and set water pressure to proper operating range and test for leaks.	\$550.00
2. Main Water Shut-Off Valve Replacement Shut down water supply, remove existing main valve and install new full-port ball valve. Restore service, test operation and check for leaks.	\$650.00
TOTAL	\$1,200.00

NOTES & TERMS

- Price includes labor and materials for the work described above.
- Excludes drywall, finish or tile repair, and repair of any pre-existing damaged piping found during the work.
- Water service will be temporarily shut off during the work; building/HOA coordination may be required.
- Any additional work will be discussed and approved before it is performed.
